

Simplicity and control in one device.

LogHub Solo is a smart logger with battery power and internal memory, delivering maximum flexibility for data collection during the transportation. Thanks to the mobile app, you can easily configure it and just as quickly retrieve all the information you need.

Data collection is **manual after transportation is completed**, or **continuous** via the app according to your needs.

No cables, no lengthy processes, **just a fast, reliable, and intuitive** solution for your logistics chain.

- Low costs.
- Easy operation.
- No internet connection required.
- Long battery life.
- Automatic PDF/A reports.
- Requires manual data download from the device.
- Data is available during transport via the app within a range of 200 meters.

Data transfer: **Anytime after manual data retrieval**

Required devices: **Logger only**

Monitoring during transport: **Yes**

Real-time notifications: **No, only LED on the device**

Connectivity dependency: **None**

Suitable for:

Individual shipping – both single-use and multi-use

Necessary devices

Logger SOLO

Logger Solo is a battery-powered device that is available in single-use and multi-use version. The sensor is integrated into the device. Logger Solo is equipped with a control button for setup of the device and a LED indicator for showing the status of the device. Data is recorded, stored and processed directly within the logger, without the need for central unit. The mobile application enables fast wireless data retrieval from nearby Solo loggers.
